

DocFlow

DocFlow Creatio offers the management of processes for creating, registering, approving, executing, and archiving company documents. Its extensive functionality and close integration with online processes make it a valuable addition to existing business processes, either as a separate function or as a self-sustaining system for comprehensive document turnover.

ComplyTrack

ComplyTrack Creatio is a unified platform for compliance management, ensuring unique set of functions and digital processes, which are necessary for the organization to protect itself against money laundering (AML), terrorism and proliferation financing (CTF/CPF). It empowers compliance automation, ensuring adherence to regulations and industry standards.

RiskMaster

RiskMaster Creatio is designed to be used as a single general register of the risks in a company of any size. The risk management system is developed on Creatio platform which enables it to be configured for modelling and automation of any specific business processes of the company and flexible adaptation to the peculiarities of business.

NormaDocs

NormaDocs for Creatio enables the management of structured libraries of internal and external regulatory documents. The system facilitates the creation, approval, and archiving of regulatory documents, the presentation of effective regulatory documents to company employees, as well as forming of a library of internal company reports.

DocFlow Collegial

DocFlow Collegial for Creatio provides centralized management of organizational matters by collegial institutions (committees, management boards, project groups etc.) including arranging meetings, managing protocols and exercising control over the execution of the decisions made.

ServicePoint

ServicePoint for Creatio allows manually and automatically register requests for various services (both external – customers' orders, and internal – requests for reports, IT, HR, legal, marketing, maintenance, etc.), manage and control these requests, and provide a feedback to the client.

Creatio is a global software company providing a leading no-code platform for process management and CRM.
